WORK EXPERIENCE

Backend Developer (Node js) - Inovant Solutions July 2025 - Present

- Developed and maintained secure REST APIs for web and mobile applications, implementing authentication, session management, and token-based authorization.
- Built and managed a centralized CMS and backend system to handle website and mobile app content, user management, and application data from a single platform.
- Designed scalable backend architecture, database integrations, and API services to ensure efficient performance and seamless frontend-backend communication.

Full Stack Web Developer - Dream Den Realty April 2024 - June 2025

- Developed and maintained Dream Den Realty's real estate platform with Mern Stack With Next js, and VPS deployment, integrating SEO, CRM, and real-time lead capture to streamline sales and marketing.
- Built an automated form-to-website system that generates responsive landing pages from user input, enabling fast property listing deployment with integrated contact, WhatsApp, and location features.

Executive Web Developer & SEO - Propsolutions4u Oct 2023 - April 2024

- Designed and developed high-converting, SEO-friendly real estate landing pages using HTML, CSS, JavaScript, and PHP, while enhancing website performance and reducing load times by 30% through optimization, image compression, and caching techniques.

PROJECTS

- **Rmfkuwait.com (Real Madrid Foundation):** Developed the complete backend platform from scratch, enabling coach bookings, time-slot management, user registrations, and academy services while building a centralised CMS for managing users, schedules, content, reports, and day-to-day operations,

Technologies: Node.js, TypeScript, PostgreSQL, TypeORM, Angular, Microservices, REST APIs

- **LIVELONG (Food Delivery App):** Developed and maintained backend services for a food delivery and wellness platform, creating REST APIs that powered mobile applications and centralised CMS operations.

Technologies: TypeScript, Node js, TypeOrm, Postgress, Rest APIs, Angular (Core UI)

- **TakaEsim & SimAura (Esim Provider):** Built the complete backend architecture and REST APIs from scratch, supporting eSIM purchase, activation, and management across Android and iOS applications. Integrated multiple provider APIs, webhooks, and a centralised CMS to automate eSIM operations, usage monitoring, and platform administration.

Technologies: Node js, Express js, Type ORM, Postgress, Webhooks, Push Notifications, Angular, Tailwind CSS

- **Shaadibiodatamaker.in** (Marriage Biodata & Invitation Maker): Built and launched a full-stack platform where users can create and download marriage biodatas and invitations. Includes user authentication, payment flow, and admin CMS.

Technologies: Next js, MongoDB, Rest API, CashFree, Auhtentication, Tailwind CSS, Framer motion

EDUCATION

- Completed BSC in Computer Science from Mumbai University Sept 2019– July 2022
